

IT'S TRULY A SMART TOILET

It Cleans itself.
Conserves water.
Easy to install anywhere.

WHY JANIECO?

In a world of depleting natural resources and an ever consuming humans behaviour, there is an urgent need to live a life of sustainability. Be it in the area of food, energy, water or any other natural resources. It's time we think and become responsible in how we use them. it's the the least that we could do for our future generation.

Rinac, has always been in the forefront of creating innovative products that has contributed to a cleaner and sustainable India, with the same goal we now bring to you a product that will bring a big difference in preserving water in the most important routine of our life: **The use of toilet.**

Millions of gallons of water are literally flushed down the drain throughout the world every day, which can otherwise be preserved for a better tomorrow.

DID YOU KNOW?

Less than 2%

of the Earth's water supply is fresh water.

97%

is salt water found in oceans and seas.

2%

is frozen. 1% available for drinking water.

CONVENTIONAL TOILET USES

One flush of the toilet uses
8-10 Lts of water

A wash basin tap consumes
about 9 litres of water every minute

BUT JANIECO USES

keeping the pandemic situation in mind we wanted the user to have a touchless experience- Our urinals flushes water as soon as it senses a person approaches and like wise after the person exits, each flush and wash uses just 400 ml of water.

400 ml
of water per wash

400 ml
of water per wash

Our Water Closet is a state of the art technology, it uses-**high pressure water cum vaccum based flush** that consumes just **1.5 lts** of water per flush. That is just a small fraction of water which the conventional Water Closet flush uses.

1.5 lts
of water per flush

The best part of Janieco is that this entire toilet gets cleaned by itself by a trigger of a button. From the water closet to urinals to wash basin to the floor more effeciently and consistently than what a janitor would do. Sounds unbelievable. watch the video here: [//www.janieco](http://www.janieco)

Self cleaning
no need for a janitor

Janieco smart toilet
can be customised as
per the requirement

Male Toilet single entry door

POD type

Male / Female separate door entry Toilet

Female Toilet single entry door
